

Health AI Clinical Assistant

Result: Medium Risk
Risk Probability: %24.02

AI Agent Comment:

■■ Moderate warning: The system has evaluated this patient as medium risk. The system evaluates the patient using both model output and clinical risk rules and classifies them in the medium risk group. The risk probability calculated by the model is 24.02%. No significant high-risk factors were identified based on the provided values. Regular check-ups and healthy lifestyle habits are recommended from a preventive healthcare perspective. This result is not a definitive diagnosis; it is intended for educational and clinical decision support purposes only.
